Joceyln Boyd  
101 Executive Center Drive, Suite 100  
Columbia, SC 29210

RECEIVED

SEP 26 2013

PSC SC  
MAIL / DMS

Dear Boyd,

I respectfully disagree with the decision of the Public Service Commission to indefinitely delay the public hearing on net metering (PSC Docket #2005-385-E) that was supposed to have been held this past September 12th, 2013.

While the Energy Advisory Council's work in consideration of net metering issues is important, it is also necessary to continue public discussion and consideration of how existing rules can be improved to allow for clean energy resource competition in our state.

Also:

Why is there not a string of windmills along our coast, where there is always wind, producing electricity? Electricity could be free for all of the state east of I-95, if not beyond that area. Is there wind on the tops of hills in higher elevated parts of the state?

We may have gray skies in the winter, but there's lots of sunlight all summer -- where are the solar panels? Have fields of solar panels in the median strips and cloverleaves of interstate highways producing electricity: no mowing! They can top every public building and be put in other unused sunny land areas.

After all, the PSC exists as a public body to best advance its own motto: "a fair, open, and efficient regulatory process that promotes cost-effective and reliable utility services." I hope that the Commission reconsiders streamlining its hosting of an open public discussion about net metering, in order to so carry-out its own vital role as a public service entity. Thank you for your consideration of this request to re-set a date to have this public discussion in the near future.

Sincerely,

**Melissa.Purvis**
